# Katch Kan<sup>®</sup>

## Upper Katch Kan™

### Problem

- Loss of valuable drilling fluid on sub-structure
- Blowout potential caused by loss of drilling fluid

### Solution

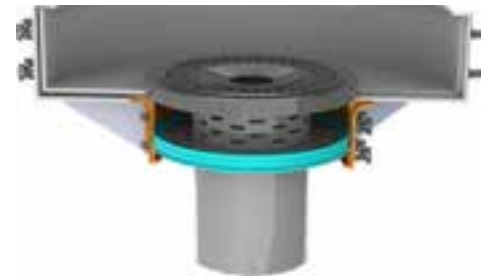

Tray that receives and contains fluids for re-direction back into the flow nipple.

### Value

- Lightweight – weighs 18% of a steel tray
- Tongue and groove design, with over-center latches; allowing the Upper Katch Kan™ to be quickly installed or removed by one person without tools
- Working with the Surface Junk Basket™, the Upper Katch Kan™ allows for rig settling with its 5" telescopic action
- Can be locked on top of annulus to protect the well from sabotage
- Effectively placed between or under the beams

### Specifications

- 17", 26", 36" - Base
- Custom made upper portion

Upper Katch Kan™ attached to Surface Junk Basket™ with Window Stripper™ inside.
