

Environmental Sustainability System™

Features

- Maintains the protective properties for workwear clothing in OSHA regulations and NFPA 2113 cleaning and care standards.
- Reduce “afterburn” fire risk on FR clothing from Oil and other fuels.
- Free of all dyes; greywater and septic safe.
- Preserves garment life through reduced heat stress and fatigue on fibers.
- Readily biodegradable, hypoallergenic, and neutral pH range.
- Eliminates hydrocarbon residue.

Safe Cleaning

- Kan Klean is an organic cleaner that destroys FOGs without using traditional toxic chemicals. It cleans garments without disintegrating their FR properties or thread integrity. Kan Klean also assists in cleaning the washing machine. Further, protecting our water systems, by allowing Kan Klean to break down the FOG's that would traditionally go into our water systems.

Composition

- Kan Klean is a coupling blend that does not contain ammonia, chlorinated solvents, hydroxides, or phosphates.

Plant-Powered Hydrocarbon Remover

A non-toxic, plant-based formulation that cleans and destroys fats, oils, and greases (FOGs). This high-performance product is made from renewable resources, is environmentally safe and is readily biodegradable.

For commercial and industrial laundry processes. Done through a series of different soak, rinse, and wash cycles.

EXTENDS GARMENT LIFE

Item	Typical Savings %
Gloves	75%
FR Coveralls	50%
FR Rainwear	50%
Washing Machines	75%

Enhances and Improves Systems

- Kan Klean works well on flame-resistant clothing, PPE, fall arrest harnesses, rainwear, and gloves. Kan Klean extends garment life as well as extends the washing machine life cycle, providing significant savings.
